ABOUT IAS

The International Accreditation Service (IAS) provides objective evidence that an organization operates at the highest level of ethical, legal and technical standards. IAS is a nonprofit, public-benefit corporation that has been providing accreditation services since 1975. It is a subsidiary of the International Code Council (ICC) a professional membership association that develops the construction codes and standards used by most municipalities within the United States. IAS accredits a wide range of companies and organizations including governmental entities, commercial businesses, and professional associations. IAS accreditation programs are based on recognized national and international standards that ensure domestic and/or global acceptance of its accreditations.

IAS' International Credentials

As one of the leading accreditation bodies in the United States, IAS is a signatory to the four primary international organizations that form a unified system for evaluating and recognizing competent accreditation bodies worldwide. These organizations are identified as "cooperations" because they have agreed to cooperate with one another by adhering to a common set of accreditation criteria and to undergo periodic onsite evaluation to determine ongoing compliance with ISO/IEC Standard 17011, *General Requirements for accreditation bodies accrediting conformity assessment bodies (CABs)*. Being a "signatory" means that an accreditation body has been evaluated onsite at its offices, a sampling of the assessments of its accredited entities have been witnessed by peer experts, and that it has been found to comply with international requirements.

These organizations agree to recognize the equivalence of accreditations granted by other signatory member accreditation bodies through a series of Mutual (or Multilateral) Recognition Arrangements (MRAs/MLAs). Once an accreditation body becomes a signatory it is obligated to recognize the certificates or reports issued by conformity assessment bodies accredited by all other signatories within a specified scope. The following organizations make up the unified system for recognition of competent accreditation bodies (ABs):

ISO : A BRIEF INTRODUCTION

ISO is a network of the national standards institutes of 157 countries, on the basis of one member per country, with a central secretariate in Geneva, Switzerland that co-ordinates the system. ISO is a non-governmental organization : its members are not, as is the case in the United Nations System, Delegation of national Governments. Nevertheless, ISO occupies a special position between the public and private sectors. This is because, on the one hand structure of their countries are mandated by their government. On the other hand, other members have their roots uniquely in the private sector, having been setup by national partnership of industry associations. Therefore, ISO is able to act as a bridging organisations in which a consensus can be reached on solutions that meet both the requirements of business and the broader needs of society, such as the needs of stakeholder groups like consumers and users.
